Chairside amalgam separator DD2011

This amalgam separator has been ISO certified and is proven 99.6% efficient in clinical testing. The Simple One is also in the process of being tested by the ADA. The Simple one is an amalgam separator that is installed at the side of the chair, removing the burdensome amalgam before it can build up in your central vacuum lines, Causing Major Problems.

AVOID COSTLY REPAIRS

The DD2011 chair side amalgam separator helps prevent waste sludge in main vacuum lines and prolongs the life of the facilities vacuum system.

Pictures of a 4" vacuum line using a central sedimentary filter system. WITHOUT CHAIR SIDE AMALGAM SEPARATOR!
(Vacuum lines only had approximately a 1" opening for vacuum due to waste and sludge build up in lines.) Vacuum lines had to be cut in 5' sections because of weight and removed. Amalgam is considered HAZARDOUS WASTE, (check your local regulations for details)

11.3 GAL. DENTAL WASTE RECYCLING KIT*

This UN tested and DOT approved 11.3 gal kit is designed for the shipment of 11 of the chair side dental amalgam separators. The external dimensions of the 11.3 gal pail are 17.91" x 14.50".
